

Microdermabrasion is one of the best physical exfoliants. It helps to remove dead skin cells to improve and pore size. Microdermabrasion is a minimally invasive procedure used to renew overall skin tone and texture.

Benefits of Microdermabrasion:

- ✓ Improve appearance of dull-looking skin
- ✓ Brightens skin complexion
- ✓ Reduce fine lines and wrinkles
- ✓ Helps to smooth coarsely textured skin
- ✓ Decreases the appearance of scarring
- ✓ Decreases pore size
- ✓ Reduces hyperpigmentation, sun damage, acne scars, melasma, and other skin-related concerns and conditions
